**HAZARD IDENTIFICATION RISK ASSESSMENT****Sub: Training For HIRA**

Dear Partners,

Industries are often required within industrial workplace activity for Hazard Identification and Risk Assessment (HIRA Studies) and at STIPL INDIA and We excel at this integral 'Safety First' service.

The objective of HIRA training is to train staff to identify and contain various activity-based workplace hazards and risks within an industrial setting that may have a low injury but the high frequency and it's not conducted on non-chemical process/activity that involve work at height, material handling, confined space, permit to work, etc.
