Method Statement

Ref. :

Date :

The functions & responsibilities of this committee are to:

1. Prior to the work, wear safety shoes, goggles & gloves. It is also advice to place a fire extinguisher near the site during brazing.
2. Prepare all tools & equipment to be used in replacing the refrigerant compressor like gas cylinder, gauge manifold, brazing set, brazing rod, flaring tool, spanner, wrench, screw driver, etc.
3. Remove the refrigerant from the system.
4. Use Loto For Tagout/Tagin before starting the work.
5. Check out whether power is off or not before touching the equipment.
6. Dismantle the equipment from the panel & then start the maintenance work.
7. After completing the work check the equipment that all parts will be connected properly.
8. If everything is ok then start the power & check the supply.
