### METHOD STATEMENT

1. Firstly check the power is OFF or not on which we have to do work. If it is ON, then OFF the equipment / machine / panel/ etc. before starting the work.
2. Put LOTO on it.
3. Wear all PPE's i.e. helmet, gloves, etc.
4. Start the work with all properly checked tools.
5. After completing the work check properly the equipment that no any tool left in it & clean the equipment properly.
6. After that inform the authorized to recheck the equipment.
7. After all necessary checking from the authorities, with their permission pull out the LOTO.
8. In presence of concerned person & with their permission, start the equipment.
9. As the equipment start check all necessary measures, if all is ok then make the site clear & clean.
