## Safety in working procedure

Following points have been brought to the notice of every workers/  
technician while doing his job in the work premises.

1) First for most line will be put off, fuses removed & then door of compartment will be opened.

A notice on the compartment will be put alerting the staff not to put on the button while work is going on or a to on the compartment for lock out & or tag out control warning workers to be sage on hazardous energy protecting workers from causing harm.

2) It will be checked & confirmed that the supply is off.

3) At the time of doing welding work a bucket of water will be kept ready. So also fire extinguishers kept ready and welding goggle will be used, where then is welding is under effect.

4) Working on high site security belt, rope and other item such a safety hanging rope and a belt with hook will be installed , so that no casualty occurs.

5) Safety equipments lick shoes, helmet, belt atc will be put an working person.

6) Supervisor & plant engineer will monitor the worker with all security norms.

7) Cool minded, peaceful & with mental condition , work will be done avoiding all sorts of untoward incidents.

8) No compulsion on working fast in order to get the work done in or prior to given time.
