JOEMILLAR'S AQUATEK INDIA PVT. LTD. 305, ELITE HOUSE, 36 COMMUNITY CENTRE, KAILASH COLONY EXT., DELHI-110048 CIN: U25209DL2003PTC118535

Notes to financial statements for the year ended 31 March 2023

1 About Company

Joemillars Aquatek India Pvt Ltd (the Company) is a Private limited company incorporated under the provisions of the Companies Act 2013 on 16th Day of January 2003. The company is mainly into the business of is Manufacturing of Flexible Water Tank, Zincalume Storage Tanks, Aquaculture Tank, Glass Fused Steel Tank and related products.

2 Significant accounting policies

a) Basis of preparation of financial statements

The financial statements are prepared under historical cost convention, on-going concern basis and all material respects with the Accounting Standards notified under section 133 of Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules 2014 and as amended thereof. The Company follows the mercantile system of accounting and recognizes income and expenditure on accrual basis to the extent measurable and where there is certainty of ultimate realisation in respect of incomes.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

b) Use of estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to accounting estimates is recognised prospectively in current and future periods.

c) Property, Plant & Equipment and depreciation

Tangible fixed assets are carried at cost less accumulated depreciation and impairment losses, if any. The cost of an item of tangible fixed asset comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price.

Depreciation on additions is being provided on prorata basis from the date of such additions. Similarly, depreciation on assets sold/disposed off during the year is being provided up to the dates on which such assets are sold/disposed off. Modification or extension to an existing asset, which is of capital nature and which becomes an integral part thereof is depreciated prospectively over the remaining useful life of that asset.

d) Impairment of Assets

The carrying values of assets are reviewed at each reporting date to determine if there is indication of any impairment. If any indication exists, the assets recoverable amount is estimated. For assets that are not yet available for use, the recoverable amount is estimated at each reporting date. An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognised in the statement of profit and loss. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortisation, if no impairment loss had been recognised.

e) Inventory

Inventory is taken at Cost or Net Realisable Value whichever is Lower.

f) Retirement and other employee benefits

Expenses and liabilities in respect of employee benefits are recorded in accordance with Accounting Standard AS -15 Employee Benefits.

g) Income taxes

Tax expense comprises of current and deferred. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act. Deferred income tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits pvt. LTL ASSO

JOEMILLARS

Authorised Signator

JOEMILLARS

At each balance sheet date the Company re-assesses unrecognised deferred tax assets. It recognises unrecognised deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

MAT credit is recognised as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. In the year in which the Minimum Alternative tax (MAT) credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal Income Tax during the specified period.

h) Provisions, contingent liabilities and contingent assets

A provision is recognized when the Company has a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and reliable estimate can be made of the amount of the obligation. A contingent liability is recognized where there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. The Company does not recognize assets which are of contingent nature until there is virtual certainty of realisability of such assets. However, if it has become virtually certain that an inflow of economic benefits will arise, asset and related income is recognized in the financial statements of the period in which the change occurs.

i) Investments

Investments that are readily realisable and intended to be held for not more than a year from the date of acquisition are classified as current investments. All other investments are classified as long-term investments. However, that part of long term investments which is expected to be realized within 12 months after the reporting date is also presented under 'current assets' as "current portion of long term investments" in consonance with the current-non-current classification scheme of revised Schedule VI.

Long-term investments (including current portion thereof) are carried at cost less any other-than-temporary diminution in value, determined separately for each individual investment.

Current investments are carried at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments i.e., equity shares, preference shares, convertible debentures etc.

Any reductions in the carrying amount and any reversals of such reductions are charged or credited to the statement of profit and loss. Profit or loss on sale of investments is determined on the basis of weighted average carrying amount of investments disposed of.

j) Revenue recognition

Revenue from sale of goods are rendered on accrual basis as when passing the title of goods which generally coincides with their delivery.

k) Earnings per share

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

I) Segment Reporting

The company is engaged in the manufacturing business which is the only primary segment identified in terms of Accounting Standard AS-17. There are no geographical segments, Hence, the disclosure requirements of the Accounting Standard are not applicable.

m) Cash & Cash Equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term investments with original maturity of three months or less.

n) Borrowing costs

ered Acco

Borrowing costs that are directly attributable to the acquisition or construction of an eligible capital asset is capitalized as a part of the cost of that asset. Other borrowing costs are recognized as an expense in the period in which they are incurred.
