

## **A COMPANY PROFILE**

Susha Founders & Engineers was founded in 1957, basically a modern foundry with a Machine Shop, Pattern Shop and Tool Room.

Susha made a name in the production of graded Casting, High Duty and special purpose, wear-resisting castings. Casting for import – substitution for Oil exploration, Power house, Defense, supplied for Twenty years Brake-Drums for heavy vehicles, to Defense and other with one lakh kilometer guarantee.

Susha Founders & Engineers developed Shell Process Machines first time in India in the year 1964-65. We manufactured ammunition parts for Defense in mass production by shell process.

The first set of Machines we manufactured and supplied was in 1970. Those were manually operated machines, and they became very popular in Small Scale Units within a short time. Subsequently, Semi-Automatic and Fully Automatic Machines with P.L.C. were developed.

Our manufacturing set up consists of-

1. Our own Foundry to cast required parts for the machines.
2. Machine Shop
3. Fabrication Shop
