

Experience Letter

BECIS has established itself as a prominent leader in the solar energy sector, having executed a diverse range of solar projects across India and extending its expertise to international markets such as the Philippines and China etc. With a portfolio that includes both rooftop and ground-mounted solar installations, BECIS has demonstrated its capability to adapt to various environments and project scales. The company's commitment to sustainable energy solutions is further exemplified by its successful partnerships with key customers, where it has delivered solar projects with a focus on efficiency and reliability. BECIS's track record over the past few years stands as a testament to its dedication to advancing solar technology and its contribution to the global shift towards renewable energy sources.
