TO WHOM IT MAY CONCERN

We, Vivan Enterprises, located at C502, Capital Towers, Wakad, Pune, hereby declare our commitment to ensuring that all tools and equipment used in our epoxy flooring projects are in good working condition, comply with relevant standards, and meet all safety requirements.

Declaration of Tools and Equipment Compliance

1. Condition of Tools and Equipment:

All tools and equipment used by Vivan Enterprises are regularly inspected and maintained to ensure they are in good working condition.

Regular maintenance schedules are followed to prevent any malfunction or deterioration of equipment.

2. Compliance with Standards:

Tools and equipment used comply with the relevant Indian Standards (ISI Mark) and guidelines such as the Energy Efficient 5-star rating where applicable.

We ensure that all equipment meets the specified standards for safety, performance, and energy efficiency.

3. Safety of Equipment:

The holding handles of all equipment are checked to ensure they are in good condition and provide a secure grip to prevent accidents.

All plants and equipment comply with safety requirements, including:

No damaged cables or loose connections.

Equipped with proper 3-pin tops for safe electrical connections.

Regular checks and maintenance to ensure compliance with safety standards.

4. Licensing and Certification:

Contract employees operating plants and equipment possess the correct licenses and certificates required for their specific tasks.

We verify the validity and authenticity of all licenses and certifications before allowing employees to operate any equipment.

5. Inspection and Monitoring:

Regular inspections are conducted to ensure the continued good condition and compliance of all tools and equipment.

Any defective or non-compliant equipment is immediately removed from service until repaired or replaced.

Inspection records are maintained for reference and audit purposes.

6. Training and Awareness:

All employees and contractors are trained on the proper use and maintenance of tools and equipment.

Safety training includes the identification and reporting of equipment faults and hazards.

Regular safety meetings are held to reinforce the importance of using compliant and well-maintained equipment.

7. Continuous Improvement:

Feedback from employees and contractors is actively sought to identify any issues with tools and equipment.

Based on feedback and inspection results, we continuously improve our equipment maintenance and safety protocols.
