

ENVIRONMENT POLICY

1. During execution of the project different types of solid, liquid or gaseous waste is generated at site ,which may be hazardous or non-hazardous in nature
2. All waste generated shall be disposed off properly as per the laid procedures and at designated location of the client. This shall be done regularly to maintain hygienic conditions at site. For effective waste management following steps shall be taken:
 - A. Waste bins shall be provided at site, fabrication yard and at storage yard
 - B. All employees at site shall be informed and make aware of the waste disposal system.
3. Environment protection is prime responsibility of all employees at site including client, contractor, sub-contractor to avoid any adverse effect on environment.
7. The following steps are to be taken to avoid pollution and to protect environment ,
 - a) Do not dispose of used oil or liquid waste direct to the ground, pit or storm drain.
 - b) Dispose of these materials only in properly labelled containers.
 - c) Whenever possible, insulation materials scraps, shaving, etc., should be wetted and put into polythene bags in order to eliminate airborne activity.
 - d) It is the responsibility of all levels of management to conduct operations in line with applicable laws and regulations, including those relating to the health of employees, the environment, and the use of toxic or hazardous substances.

The appropriate control procedures will be developed for those substances that are known to be hazardous to health or the environment. Specific precautions for the handling, use, storage, transportation and disposal of such substances will be developed and communicated to management and the necessary employees. Safety or other designated staff functions at the corporate, regional, divisional, or project level will directly assist managers in the implementation of procedures.
