WELCOME

Sekar Business Executive

We stand apart from our competitors by the way in which we serve our customers. The company has different warehouses that have the technology, which is required to store and manage the bulk inventory.

This company prides itself on its team of warehouse managers, Quality Analysts (QAs) and after-sales managers. If it were not for this team, this industrial products supplier would not have carved a place among the leading names in the market. The customers have always trusted in every product that this company has delivered.

And a major portion of that trust is received because of the company's team of QAs. They test the products against different parameters so that the customers get nothing short of the best.

Sekar
Business Executive

The company was established in 2015 in Vellore (Tamil Nadu), by Sekar a business executive. Puv Enterprises deal with all kinds of industrial CNC, SPM machines spare, chemical and service are available, AMC contract is also available. We stand apart from our competitors by the way in which we serve our customers.

The company has different warehouses that have the technology, which is required to store and manage the bulk inventory. Along with the storage technology these warehouses are equipped with sophisticated inventory management software applications as well.

WHAT WE DO?

We provide the best CNC & SPM machine services and spare parts & Industrial chemicals supply in Ranipet (Vellore)

You name any component which is needed to fix your CNC we will definitely have. We have a variety of collection starting from disc spring to FANUC drive fuse.

OUR SERVICES

✔ CNC Trouble Shooting

Our troubleshooting methods are systematic and we ensure that the problems that we attend to are never repeated again. One of the major highlights of Puvi Enterprises is that we teach our clients to understand the working of our machine and how to attend to minor problems in the CNC thus minimizing the downtime.

✔ CNC Electrical Control Panel Wiring

From small and compact to large and complex machines, Puvi Enterprises offers the right CNC control systems. Our highly adaptable family of control systems ranging from basic to advanced for applications that extend from traditional to groundbreaking.

✔ CNC ReConditioning Retro Fitting

We do undertake complete Mechanical Reconditioning of various CNC machine tools, where in we commit OEM Machine Tool Geometrical accuracies and performance after Re-conditioning. We are equipped with advanced technology and modern tools to execute these services exactly as desired by patrons.

✔ Annual Maintenance Contractor (AMC)

Puvi Enterprises provides AMC Services for the CNC and SPM and provide end-to-end machining solutions on-site as well as off-site of the customer. This helps the client in maintaining the machine by preventive and predictive maintenance tasks, which ensures the smooth and trouble free working of the machines.

✔ PLC & CNC Logic Writing

CNC programming software creates program codes and instructions used to run a machine tool controlled by a computer. Each unique part requires its own CNC program. Modern CNC machines are much more advanced than their predecessors and have full-fledged PCs which permit all kinds of interaction with the user.

✔ 4th Axis Interfacing

4-axis milling involves the same processes involved in 3-axis machining, where a cutting tool is used to remove material from a piece to create the desired shape and profile. However, in the case of 4-axis machining, milling is performed on an additional axis.

✔ Auto Door Interfacing

This option opens the machine door or overhead door automatically and can be designed for use on any machine tool. Auto Doors reduces operator fatigue during repetitive machining operations, increasing operator productivity and allows for unattended operation when used with a robotic loader.

✔ Hydraulic Power Pack Fixture Logic Inter Facing

Mobile hydraulics applications have recently been increasing so much with hydraulic power packs. Some applications are as follows; dump trailers, electric sanitation trucks, snowplows, telescopic logistics equipment, like the dock leveller, car tailgates, wing trucks, electric pushcarts, and electric pallet lifts.

OUR PRODUCTS
