Practical Observations

> RHOMBERG TEST

Exercise : Ask person to stand with his feet closing approximated position. First ask to stand with open eyes and then with closed eyes.

Observations : If you observed unsteadiness in the position of person then the Rhomberg Test is positive.

TANDEM WALKING

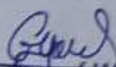

Exercise : First draw a straight line on floor, then ask person to walk on straight line by placing one heel directly in front of opposite toes with eyes open and closed.

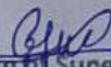

Observations : If you observe sways or staggers then Tandem Walking Test is positive.

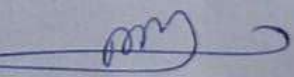

> FINGER NOSE TEST

Exercise : In this Test ask person to extend and abduct the arms completely and then touch the index finger tip to the tip of his nose. First slowly and then capacity.

Observations : If more irregularities are observed as finger approaches the nose or person may stop before he touches the tip of nose then finger nose test is positive.
