HEALTH AND SAFETY RISK ASSESSMENT

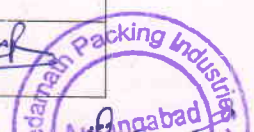

KPI has made law to conduct health and safety risk assessments to ensure the safety of their employees and the public.

Health and safety risk assessment is a process that identifies, analyzes, controls, and eliminates hazards that can cause injury or illness to the workforce and negatively impact the business.

Managers and safety officials when managing health and safety hazards at work. Spot potential and existing hazards such as biological (if any), chemical(if any), energy, environmental, and the like.

Evaluate each hazard's risk level and provide preventive control measures. Monitor and review planned control measures and advise if further measures are required. Lastly, use this health and safety risk assessment form to provide overall recommendations to avoid and manage risk hazards.
