Address: Plot No - A19, GAT No- 1325, Sonawane wasti road, Chikhali, Pune, MH-411 062

Contact Details:

Phone: 9922084515

Email: shree.enterprises0270@gmail.com

A safe work procedure (SWP), which may also be referred to as a job safety analysis (JSA), job hazard analysis (JHA) is a procedure which describes how work is to be carried out in a safe and standardised process. SWPs outlines the hazards, risks and associated controls measures to be applied to ensure the task/activity is conducted in a way to reduce the risk of injury.

SWPs provide information to assist workers to perform tasks safely. They include:

- describing how the work is carried out
- identifying the work activities assessed as having safety or environmental risks
- stating what the safety and environmental risks are
- describing the control measures that will be applied to the work activities
- describing how measures will be implemented to undertake the work in a safe and environmentally sound manner
