

RS Services

PROCEDURE FOR AC WORKING

1. Repairing for panel AC.
2. Repairing for split AC.

Procedure for panel AC

1. If found problem in panel ac first we have to check at location.
2. If the issue cannot be resolved, the maintenance crew will cut off the supply.
3. Following that, we'll see if the compressor is operational or not.
4. Then we will check compressor gas and motor operational condition.
5. The panel machine's AC will be installed once the job is finished and the trail is satisfactory.

Procedure for split AC

1. If found problem in split AC the maintenance crew will cut off the supply.
2. He will check electrical accessories and fan motor or gas pressure.
3. After that, he will either report to the maintenance department or, if it is not possible, arrange for service.
