ABOUT US

At VI AUTOMATION ENGINEERING, we provide range of discrete Industrial automation solutions and service for enhancing higher productivity and quality with excellent return on investment. We provide innovative automation solutions for various industries like Automotive, Electrical, Electronics, and General industries with dedicated team to focus for each segment.

VI AUTOMATION ENGINEERING was founded by One Automation experts in year 2022 Founders with different domain expertise and 14years individual experience ensured there was a right mix of people with clear focus on providing high quality and cost effective automation solutions.

Over last three years, we have grown almost 100% year on year by adding experienced senior team with critical domain expertise. We believe our motivated team with their experience, expertise and service bring in great value to the machines those are built and enhance buyers overall organization values.

Right from the start we pride to have associated with major international brands who are

leaders in their field like Renault, Nissan,Daimler,Hyundai,Ford India,Ashok Leyland,RICO As a Main Vendor and Sub Vendor

AUTO,IR INDIA,Obara, Yusen Logistics,Aqua Groups,Caterpillar,Procandour,Wevin and many

more. Many automation systems are built to

these reputed organizations those have helped us to understand the international standards, systems and Processes.

ORGANIZATION PHILOSOPHY

We are dedicated in providing total turnkey automation solutions. Our goal is to be a premier

solution provider for industrial automation requirements. We believe in achieving excellence

in automation solutions by engaging customers as partners in complete system.

We are committed to continuous improvement of our team with regular training to achieve

excellence in automation system building. We believe in building most reliable automation

systems those are easier to operate and maintain.

PACKAGING & WAREHOUSE AUTOMATION SOLUTIONS

We provide turn key Packaging and Warehouse automation solutions for various industries for maximizing productivity and minimizing implementation and operating cost.

MANUFACTURING AUTOMATION SOLUTIONS

We provide turn key Manufacturing automation solutions like ROBOTIC welding Systems, Manufacturing.

FACTORY AUTOMATION SOLUTIONS

We provide turn key Factory Automation solutions like Automated assembly lines, Work Cells, Robotic and Gantry type Pick & Place for handling different types of products.

PROJECT MANAGEMENT SERVICES

We provide comprehensive manpower support services like AMCs, Plant relocations, New plant installation, Manufacturing support and Spare parts support services.

MISSION AND VISION

Our Mission

To Add Value to Customer by Providing Timely Engineering Solutions.

Our Vision

To be Internationally Acclaimed Engineering Company for Quality, Delivery and Service.

Core Values

- ***Customer Satisfaction***
- ***Integrity***
- ***Integrity***
- ***Continual Growth with Continual Training***
- ***Excellence in work.***

PROJECT MANAGEMENT SERVICES

Viae was founded by starting its operation with Projects Management Services (PMS). We have very vast experience in PMS by handling large projects like car assembly line for Nissan and Renault, FORD Plant relocation, Industrial piping and maintaining plants. We have large experienced project management team for PMS who have handled many projects. The major services offered are,

- ❖ Turnkey Project Management Solution
- ❖ Installation support services
- ❖ Industrial piping services

Turnkey Project Management Solutions

We provide total Turnkey Project Management Solutions by way of Consulting and Contracting support for executing Greenfield & Brown field projects particularly for Manufacturing, Ware house, Automation Assembly Industries.

Our Turnkey Design-Build Construction Support that includes layout preparation, Utility and Facility build like Fire Safety, Complete Utility Piping, Process piping, Structural work.

- ❖ Total Project Management Service

Installation Support Services

We provide manpower support for wide range of services like,

- ❖ Installation and Commissioning of new plants
- ❖ Plant relocation.
- ❖ Utility and Facility Construction
- ❖ ROBOT teaching
- ❖ Annual Maintenance Contract.
- ❖ Wear parts manufacturing support.

Industrial Piping Service

Turnkey solutions in providing complete Engineering, Fabrication, Construction and Testing of piping lines for industrial manufacturing facilities.

Excellent design team with network of leading consultants to give complete piping scheme with all elements like process valves, pumps, cooling towers and other

pipng elements.

- ❖ We provide our expertise service in following areas
- ❖ Complete airline piping with compressor sizing for industries
- ❖ Design, Fabrication and installation of interior and exterior fire sprinkler
- ❖ Systems for industrial and commercial establishments.
- ❖ Piping for industrial gases.
- ❖ Special piping design, fabrication and installation like SS piping for process

❖ WATER PROJECTS

❖ WTP

❖ ETP

❖ STP

About VI AUTOMATION ENGINEERING

VI Automation Engineering Systems was founded by experienced automation Engineers in 2022 as Project Management Service provider for various Engineering companies and eventually started Automation Business in 2022. Today, We have a team of highly energetic eight young entrepreneurs having cumulative experience over 14 years in Automation and SPM building.
