 Sunil Mogal

FW: M/s FNI> Serious & repetitive concern observed.

To  Laxmikant Kulthe

Dear M/s FNI Team,

Once again serious concern observed in received lot Ø30 Oil seal & Dust seal form M/s FNI. Such defects may leads to serious customer complaint or field failure.

- Oil Seal (520HN03602) – On SEVENTH time oil seal observed **without rubber / Short fill material**. This is most repetitive concern & easily arrested if any inspection controls applied before dispatch. One piece found NOT OK.
- Dust Seal (520GA02102) – On resting face **excess rubber material accumulated observed**. This causing gap in between matting part & Dust seal. Total 03 parts found NG.

Skip of such easily arrested defects itself clarifies that poor inspection control at final inspection stage. Kindly plan your visit for defect part verification & control establishment. This is for your information & necessary actions.
